

Square Commercial Grade Plywood Folding Banquet Tables

Exclusive: 13 Layers of Premium Okoume Plywood Plus 5 coats of Polyurethane To Seal and Protect The Finish!

So well built, we include an extended warranty (a \$14.99 to \$19.99 value!) absolutely free, to DOUBLE your warranty from 2 to 4 years! Our Plywood tables are over-engineered and over-built for extra strength and unmatched longevity. We don't cut costs. We design and build our tables to be stronger and more beautiful than other tables. That's why we use renewable, sustainably grown Okoume plywood. It delivers a high strength-to-weight ratio, meets strict standards for strength, durability, and resistance to decay and delamination. It's the only Plywood we use in our tables.

Sure Okoume is tough, but it's also renewable, sustainably grown, versatile and lustrous. Okoume offers a clean, smooth, low-warping surface along with a gorgeous grain pattern. The gorgeous finish of Okoumewood makes it a popular choice for fine furniture makers -- where high-quality, highly durable materials are essential. Our plywood costs us more than theirs does, but we prefer a better, more durable table to the high profits that our competitors make.

We use 18 Total Layers of Beauty...And protection.

Not 8- or 9-wood layers, like some others, our tables feature 13 wood layers (11 Okoume Plywood layers, 2 veneer layers) and 5 layers of polyurethane!

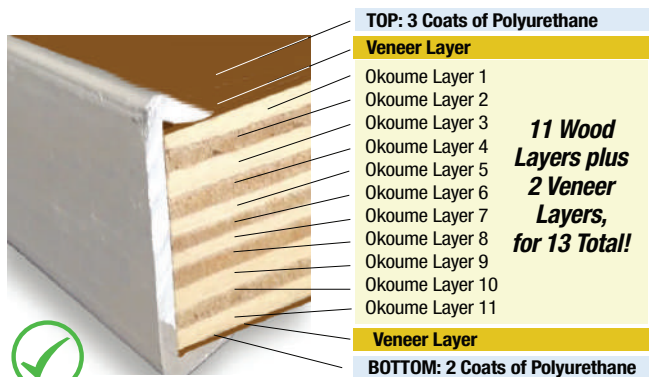

Not 7 or 8 Layers...

...Or 9 Layers...

OUR 11 WOOD LAYERS MAKE OUR TABLES STRONGER.

High-Tensile Metal Edge

11 Wood Layers plus 2 Veneer Layers, for 13 Total!

The weight capacity of our plywood tables is 880 lbs.

More layers, more strength.

Other tables with fewer layers cannot match the strength and stability of our 11 wood layers. With a smooth, elegant finish complimented by 2 layers of wood veneer and 5 layers of high quality polyurethane.

Renewable, Versatile, Lustrous and Very Tough.

Okoume plywood is made from sustainably grown and renewable lumber. Edges are pressure wrapped with our own high tensile strength Aluminum edge banding, applied with tons of pressure -- for a lifetime of beauty and consistent performance.

Commercial grade, 3/4" (.75") thick Okoume plywood

3 Coats of Polyurethane on the top, 2 coats on the bottom

We use sustainably sourced farmed wood in all our wood products. We do not use old growth trees, we do not deforest. Plus we plant new trees in countries devastated by deforestation.

All include protective metal edge

16-Gauge Electrostatic Powder coated Steel Legs

Strength Where it Counts: Steel Locking Legs and Hardware

Our tables feature electrostatic powder coated anti rust steel legs with 1" diameter tubing designed to last a lifetime.

Posi-Loc™ wishbone leg locking system prevents accidental folding or collapse when in use.

100% bolt-through construction (not screws) for leg and runner attachment.

Long heavy duty support frames provide added strength and rigidity.

Our specially designed, high tensile Aluminum edge wraps around the entire table. This provides 2x protection during event set up and tear down.

Closed and Locked

Click to Open

Posi-Loc™ Folding Legs for safety is the leg locking system that fixes the legs in an open position preventing them from closing and the table collapsing.

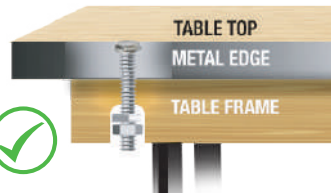

- Replaceable, non-marring floor caps, 1" diameter
- Heavy Gauge Steel Legs
- 2 Year Warranty Doubled to 4 Years A \$14.99 - \$19.99 Value

We BOLT and GLUE our table tops to our frames.

Our tables are stronger because every joint is extra strong. Others use a single screw to attach the table top to the framing, but our table tops are bolted to their frames, with a lock nut and washer -- and glue! And not just any bolts, we use cold-formed steel alloy bolts to improve the physical strength and longevity of our tables.

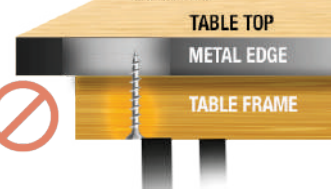

Our Tables

Our frames and table tops are fastened with glue, plus lock nuts and washers.

Other Tables

They use only screws to secure the table top to the frame.

CHIVARI Square Commercial Grade Plywood Folding Banquet Tables

Rugged Okoume Plywood **EdgeMAX** Construction

Features an aluminum C-shaped protective edge that wraps around the table.

Okoume plywood is made from sustainably grown and renewable lumber.
