Frame Material	standards

18-gauge, 7/8" square tubing for unsurpassed stability and

All critical joints are welded, creating a stronger -- and longer lasting bond -- for safety and longevity.

**We Weld All Critical Joints
We Don't Use Screws To Secure The Frame**

A Critical Difference

Critical joints are secured by welding them -- for maximum strength and stability! No screws!

Our beautiful, muscular Banquet chairs do not use screws to secure the frame -- the joints in our chairs are spot-welded for increased strength, protection and longevity. It's an extra step, but our chairs are built by skilled craftsmen who create the finest indoor event chairs.

Super Stackable!

Our 18-gauge steel frame is equipped with bumper guards to protect the finish when stacked, ensuring the longevity of your investment.

Removable Seat!

The only screws we use are to secure the chair's back panel and seat, allowing them to be easily removed or replaced.
