Units Per Pallet	48

Safety Standards Meets or exceeds ANSI/BIFMA standards

18-gauge, 7/8" square tubing for unsurpassed stability and

All critical joints are welded, creating a stronger -- and longer lasting bond -- for safety and longevity.

We Weld All Critical Joints We Don't Use Screws To Secure The Frame

**A Critical Difference**  
Critical joints are secured by welding them -- for maximum strength and stability! No screws!

Our beautiful, muscular Banquet chairs do not use screws to secure the frame -- the joints in our chairs are spot-welded for increased strength, protection and longevity. It's an extra step, but our chairs are built by skilled craftsmen who create the finest indoor event chairs.

## Super Stackable!

Our 18-gauge steel frame is equipped with bumper guards to protect the finish when stacked, ensuring the longevity of your investment.

## Removable Seat!

The only screws we use are to secure the chair's back panel and seat, allowing them to be easily removed or replaced.
