Units Per Pallet	48

<b>Safety Standards</b>	Meets or exceeds ANSI/BIFMA standards
<b>Frame Material</b>	18-Gauge Steel Square Tubing: 7/8 in.

**We Weld All Critical Joints**  
**We Don't Use Screws To Secure The Frame**

### A Critical Difference

Our beautiful, muscular Banquet chairs do not use screws to secure the frame -- the joints in our chairs are spot-welded for increased strength, protection and longevity. It's an extra step, but our chairs are built by skilled craftsmen who create the finest indoor event chairs.

### Super Stackable!

Our 18-gauge steel frame is equipped with bumper guards to protect the finish when stacked, ensuring the longevity of your investment.

### Removable Seat!

The only screws we use are to secure the chair's back panel and seat, allowing them to be easily removed or replaced.
